| STANLEY             | STA           |
| TALA TOOLS          | TAL           |
| TREND               | TRE           |

The search prefix is the three letter code to be found before the actual product model number

When you know which brand the product you are searching for is - simply find the search prefix associated with that brand, followed by it's model number

For example if you are looking for the Tala Wallboard Saw and you know it is model number 69161.

Find Tala on the list of brands and see it's search prefix beside it.

You will now know that our TOB code for this product is TAL69161
